

GUSTAVO SILVA KUHL DE OLIVEIRA

ABOUT ME

I am a developer from Brazil studying mainly in a self-taught way via online courses and technology documentation. I am willing to learn any technology to solve any problem at the company. I'm looking for a first work opportunity to show my skills.

HTML

REACT.JS (Hooks, React Router, etc.)

CSS

FIREBASE

JAVASCRIPT

GIT

TYPESCRIPT

STYLED-COMPONENTS

NODE.JS

Trying to make
the world
better, in some
way.

PROFILE

Front-end developer, but in love with mobile development. Every day I want to learn more about things that I love. I've got willing to work in a team because I believe that it is a great opportunity to share knowledge and different solutions for the same problem. One of the reasons I love to develop is that I can create solutions to someone's problem and makes people's lives easier.

ACADEMIC BACKGROUND

2021 - 2022

Systems analysis and development

2022 - 2025

Information system

EXPERIENCE

I have developed many personal applications as a Disney plus clone using React.JS(useState, useEffect, useContext, react router, etc.), Typescript, styled-components, and firebase. Another project that can be highlighted is a website that calls some data from a cryptocurrency API that returns bitcoin value in real-time in a friendly interface. All these projects are available on my website www.gustavo-kuhl.netlify.app
