## PROFILE

Front-end developer, but in love with mobile development. Every day I want to learn more about things that I love. I've got willing to work in a team because I believe that it is a great opportunity to share knowledge and different solutions for the same problem. One of the reasons I love to develop is that I can create solutions to someone's problem and makes people's lives easier

## SKILLS

### Techs

- HTML
- CSS
- JavaScript
- TypeScript
- React.JS
- Node.JS
- Styled-Components
- Firebase
- Git

### Languages

English  
Intermediate / Advanced

Portuguese  
Native

## ACADEMIC BACKGROUND

02/2021 - 06/2022

### Systems analysis and development

Universidade Paulista  
UNIP -Brazil

02/2022 - 12/2025

### Information Systems

Uninove - Brazil

## ABOUT ME

I am a developer from Brazil studying mainly in a self-taught way via online courses, technology documentation, and practicing in personal projects. I am willing to learn any technology that is required by the company to solve problems.

## EXPERIENCE

I have developed many personal applications as a [Disney plus clone](#) using React.JS(useState, useEffect, useContext, react router, etc.), Typescript, styled components, and firebase. Another project that can be highlighted is a cryptocurrency converter that calls some data from a cryptocurrency API that returns bitcoin value in real-time in a friendly interface. All these projects are available on my website: [www.gustavokuhl.tech](http://www.gustavokuhl.tech)
